

like the arch here -
makes the transom
feel a little softer
rather than straight
across feeling more
harsh, looked like (2)
36" double doors ;
overall like the door
design too

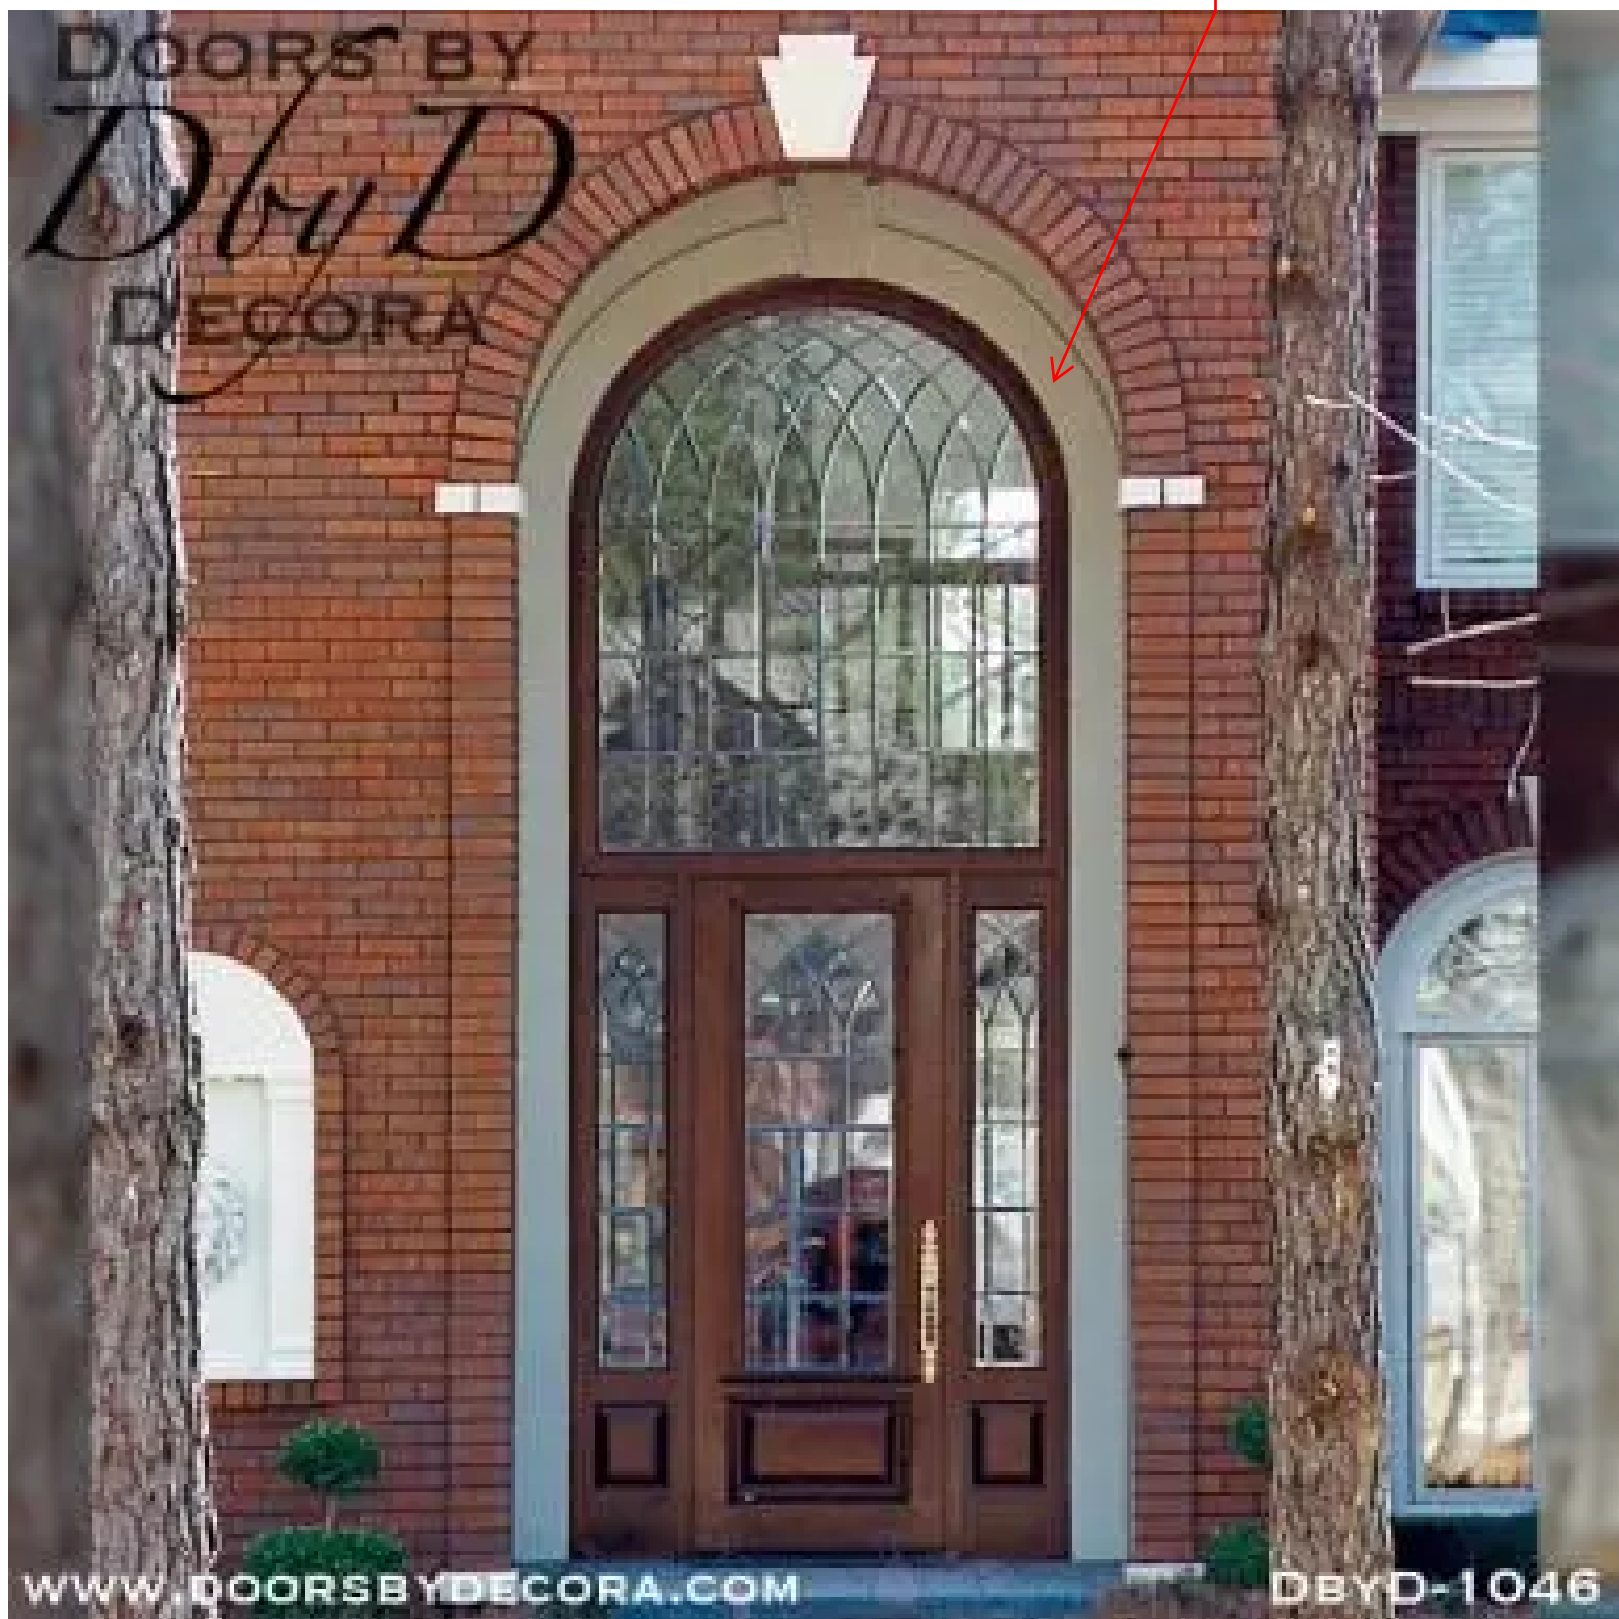

like the exterior trim
and sidelight designs,
and the transom
design - not a fan of
door itself - what if
they did a leaded
glass design in the
transom with
mullions?

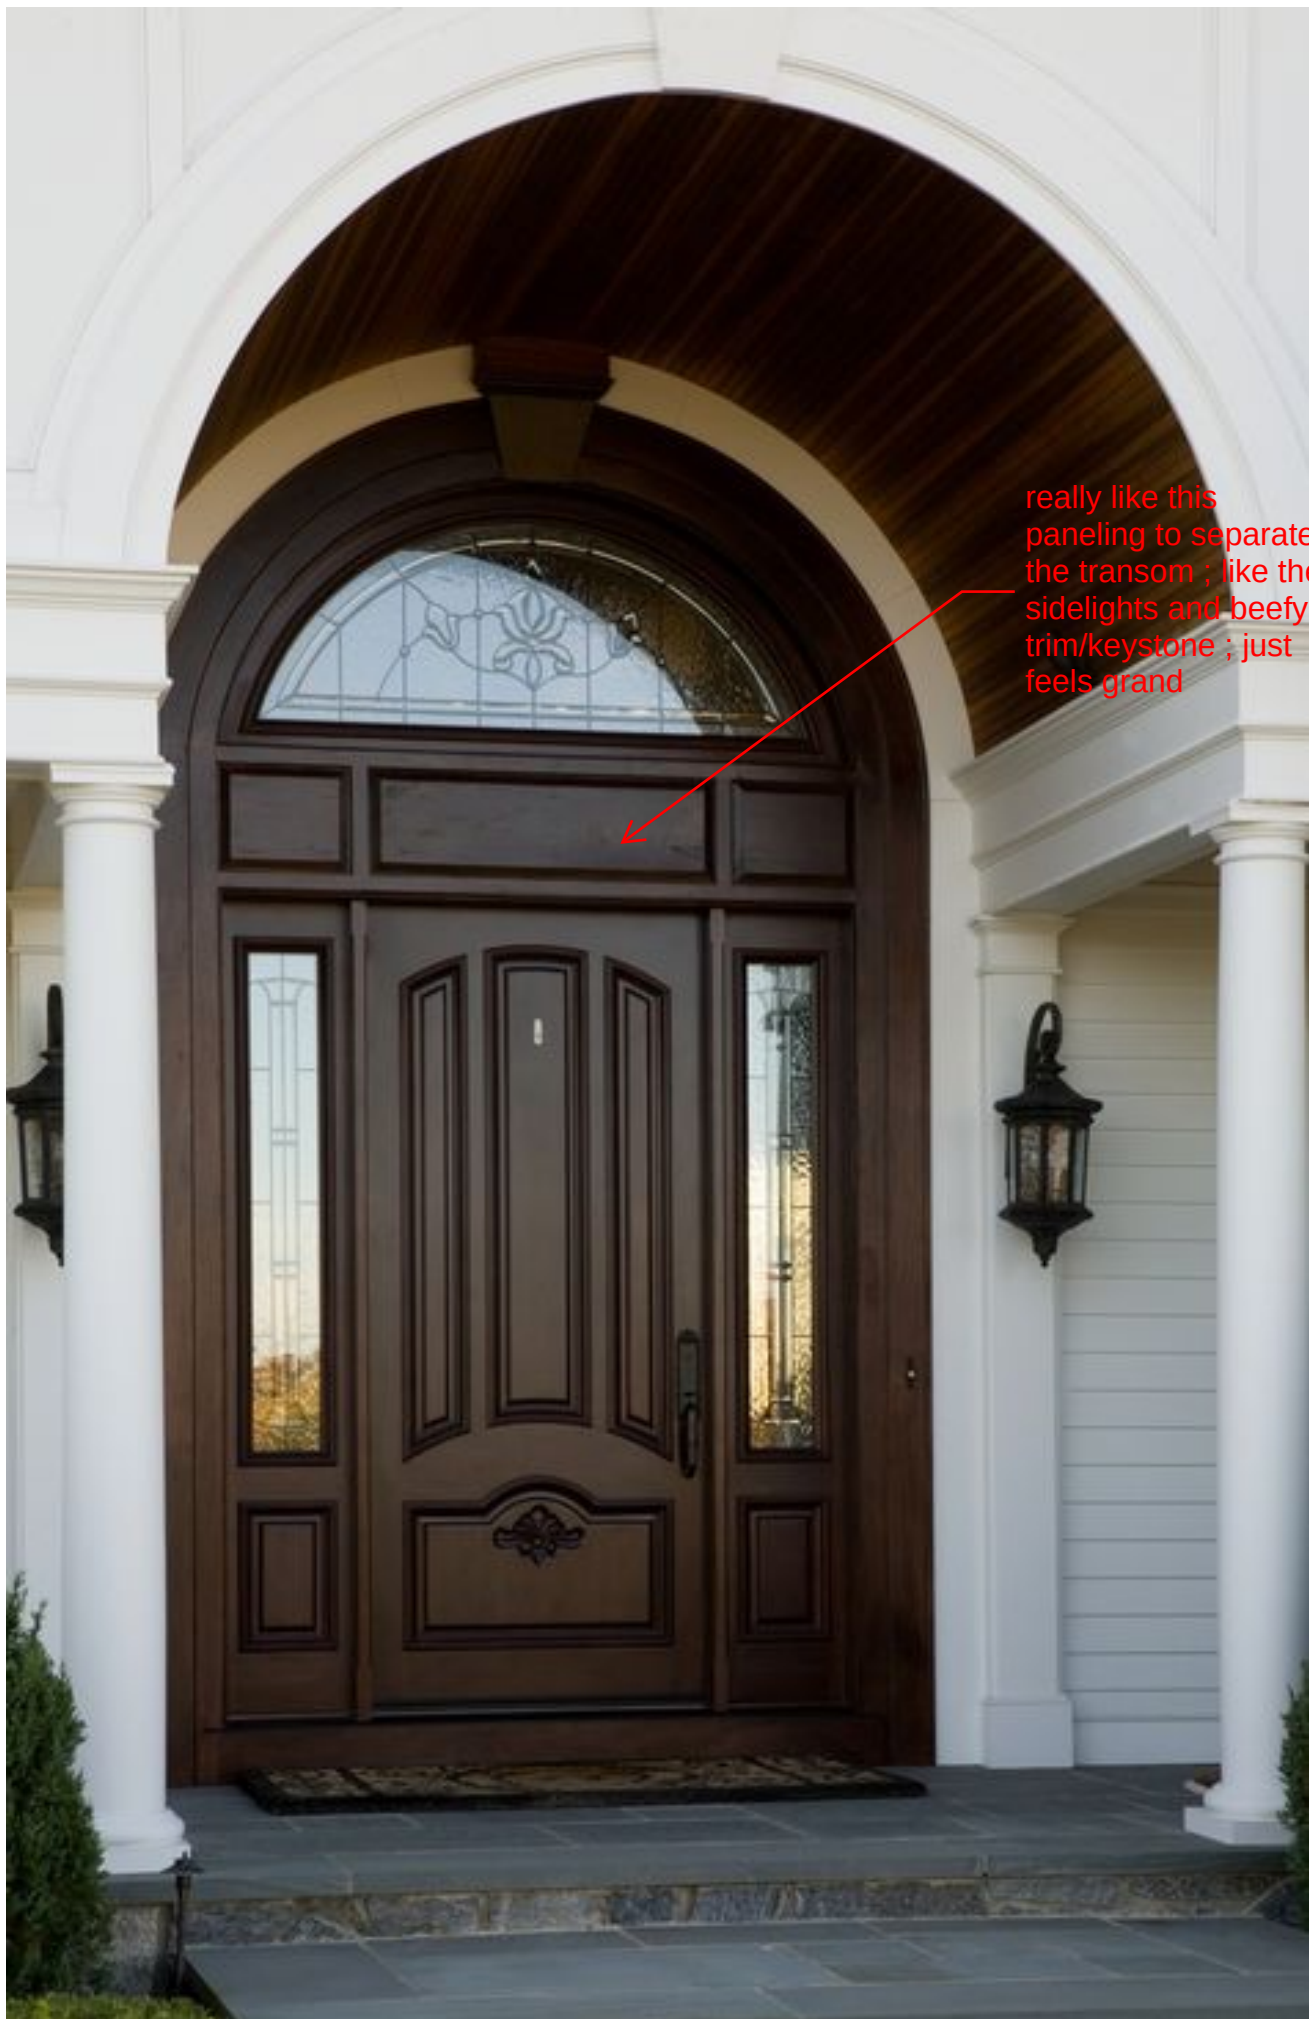

LOVE THIS DOOR!!!
so ornate and so
much pretty detail

precast fill in

really like this
paneling to separate
the transom ; like the
sidelights and beefy
trim/keystone ; just
feels grand
