Proposal for 1672 S 150th Ave - Ostronic Res - McNeil

Proposal good for 30 days. Acceptance of this proposal is an agreement with Larry Peterson Construction to frame your project. Scheduling will be done in a timely manner based on the date of acceptance of this proposal and previously accepted work prior to the date of your acceptance.

"This proposal is not a contract and no contract is formed until the general contractor and Larry Peterson Construction agree to and execute a formal contract."

Notes to General Contractors

Fall Protection Installation and Responsibility:

LP Construction will install fall protection at windows, doors, and stair openings as required for safety. Once properly installed, the fall protection may not be removed, altered, or relocated by any other trade.

If fall protection is removed or altered by other trades, LP Construction shall not be held responsible for any safety incidents, compliance violations, or liabilities arising thereafter. Responsibility for reinstallation or replacement of fall protection after removal shall rest solely with the trade(s) who removed it.

We have seen a change in the services provided by some of your lumber suppliers. As a Framing Contractor with multiple people on a project at any given time, having a complete material package is essential. We have seen shortages on almost every single project we have been contracted to frame. We must continually run after items due to shortages. It has gotten out of control, costing LPC money running after materials and employees waiting for materials. Effective October 1, 2020, there will be a charge for every trip we have to make to the lumberyard to pick up materials. We do not want to charge you this fee as you do not want to pay it. Please verify your lumber packages are complete prior to us starting your project.

All wire transfers made to Larry Peterson Construction will only be accepted in the following manner. You must make direct contact with Larry Peterson for approval prior to the transfer, either by phone, text or email, and confirm details, including amount, location for pickup and method of transfer. If this process is not followed, Larry Peterson Construction accepts no responsibility for where the monies have been sent.

Thank you – LPC Management Team
