## For Thursday meeting

Phil Wood <fourwoodne@icloud.com>

Tue, Aug 18, 2026 at 9:10 PM

To: Madisyn van den Boogaart <madisynm@mcneilcompany.com>, Kris Patton <kris@interiorsbyjoan.com>

Cc: Michelle Wood <fourwoodne@msn.com>

Hi Madisyn & Kris-

Items to be discussed for cabinetry:

- General questions -
  - What does Routed Toe for HVAC look like as compared to Furniture Toe?
- Kitchen -
  - large window above sink - will that be drywall (plan says drywall) or wood panels on sides and under hang? We know the underside of the arch will be a wooden panel with can light but believe we discussed wood around the window too?
  - Freezer section of refrigerator - drawers vs. panels? If leave as panels, concerned about how the pulls would be positioned.
  - Island - left of microwave - confirm those are pullout drawers and not shelves behind the two doors.
  - Island - across from double ovens, can the door for the narrow cabinet be touch-latched so no handle needs to be used? Probably similar to the two in the seating/legroom area.
  - To hide outlet right of microwave -add a drawer front (fold down) or extend cabinet up? Any other ideas to hide the outlet?
  - Height of hood from floor appears to be about 6'. Is this standard or do people who are over 6' just have to duck?
  - Glass boxes at top flanking the hood - should they be part of the same door of the cabinet below or separate?
  - Top drawer immediately to the right of the stove doesn't have a pull. Is there a reason or just missed on plans?
  - Mirror product on refrigerator and other mirrored cabinet = Hollywood Glass?
  - Use furniture toe in kitchen
- Hearth/fireplace wall -
  - wood-framed glass shelves (unlike Servery which will be all-glass shelves).
  - Overall wall design please have your team mockup a design.
  - Please look up the 65" Samsung Frame TV and the custom 3" Antique Gold frame that is provided by [www.DecoTVFrames.com](http://www.DecoTVFrames.com) for around \$699 so we have exact dimensions needed. Also, Samsung sells two Frame TVs - 1) The Frame TV and 2) the Frame Pro TV and I'm not sure what the difference is. Doug can probably help us decide on that as we'll want that TV for both the Hearth room and master bedroom (will have to measure there to know whether we should get the 55" or 65"). I believe the gold frame for the 65" TV is 62 1/16" wide by 37 7/16" high but please verify. There are a couple of add-on products with the Frame that we may want to consider based on Doug's suggestion.
- Servery - can we add "Schluter" gold edges on glass shelves?
- Den -
  - confirm ogee edging for wood tops
  - confirm top material for closet - Bursa? A durable surface would be better than wood due to large printer sitting there permanently.

CEAVE  
 9/10  
 FOR MONTH  
 OF SEPTEMBER

- Make credenza 27" deep (top) vs. current 25" to give a little extra room for monitors to sit while allowing Phil to not have his face smashed right up against them. This will obviously make the lower credenza 2" deeper at 26" vs. 24".
- Laundry -
  - you are increasing the depth of the appliance area by two inches to 39". Since the walkway space in there is limited as it stands, can some of the plumbing/pipework be moved into the wall (similar to new master closet plumbing) to save space in the room?
  - Hanging rod - discuss height and movability.
  - "Roomba" opening in cabinet - confirmed height needed?
- Phil's closet -
  - add another 9 7/8" drawer which will raise it to 52" or so. Still want to do built-in mirror above.
  - Furniture toe on dresser?
  - Need to see available tie and belt holders and other accessory options. Do they attach into the predrilled holes and, if so, will the wood edging fronts be in the way of them extending out?
  - Outlet above floor is currently where the dresser will go so it will need to be moved to either side.
- Michelle's closet -
  - Furniture toe under dresser or is it already decorative?
  - Flat drawer fronts on jewelry drawers, decorative edge?
  - Need more hanging space on the two lower sections on left when walking into her closet (bars not spaced far enough apart to hang normal clothes). Need at least 32-34" in between each to allow proper hanging. Would removing shelves on top of the bars give us the space? Or, can we reduce the height of the motorized spaces above a bit?
  - Ensure depth of "fancy" cabinetry is same depth. Plan shows 15" deep on the entrance side and 15 1/4" on the window side of her dresser.
  - Need to see belt holder, scarf holder, and other accessories so we can choose.
- Master bath-
  - No furniture toe around tub.
  - Closet under TV should be full-length mirror with routed edge (hidden) pull.

Thanks!

Phil & Michelle
