In accordance with manufacturer recommendation, Table Rock Co. (TRC) requires that all stone be installed utilizing pieces from multiple boxes, from multiple skids, simultaneously to ensure proper pattern and color blend. TRC is not responsible for the proper blending of stone pattern and/or color.

The undersigned acknowledges that he/she is (and/or represents) the homeowner and is qualified to make a selection for the above listed property. The undersigned further authorizes TRC to order the above listed selection based on quantities determined by TRC from prints and specs provided to TRC by the undersigned or the undersigned's general contractor/mason. The undersigned understands that exact quantities will be ordered and is responsible financially for that order either personally or through a general contractor/mason. TRC has a strict policy of NO REFUNDS, RETURNS, &/OR EXCHANGES.

The undersigned understands that natural stone is a product of nature and is, therefore, subject to all natural processes. Because of this, TRC is not able to guarantee, or warranty, the consistency of color and quality. We will not be responsible for any leaching out, flaking, crumbling, bleaching out/fading (natural processes of nature and/or installation) of any natural stone product. These occurrences are seldom, but can occur due to the nature of the natural rock. All stone must be sealed and maintained with the use of a quality sealer.

Any Stone, Stucco, and EIFS to be installed on any interior will be after paint but before flooring is installed. Owner(s) may be required to touch up paint after stone, stucco, and EIFS installation. TRC will not be responsible for flooring installed prior to stone, stucco, or EIFS installation. Small cracks in Stone, Stucco, and EIFS are to be expected. Any crack under 1/8" is considered normal. Grout color will vary in consistency based on environmental and curing rates. TRC cannot be held responsible for inconsistent grout color and/or cracking.
